EUROSYSTEM

# The low-carbon transition, climate commitments and firm credit risk

---

4<sup>th</sup> JRC Summer School on Sustainable Finance

July 7, 2022

**Carbone, Giuzio, Kapadia, Krämer, Nyholm, Voizan**

Disclaimer: The views expressed are those of the authors only and do not necessarily reflect the views of the European Central Bank or the Eurosystem.

# Motivation

Transmission channel

## Drivers of transition risk:

Government policy, technological change, market sentiment urge firms to adapt to a low-carbon economy and to reduce their GHG emissions

## Firms' credit risk:

Reduced ability of the borrower to repay and service debt

## Banks and investors' risk of losses:

Reduced ability to fully recover the value of an investment in the event of default\*

**Policy relevance: Climate disclosure, Credit ratings, Risk weights, Central bank operations**

\* BCBS (2021). Climate-related risk drivers and their transmission channels

# Research questions and main results

## *How is climate-related transition risk reflected in firm credit risk?*

1. How is firm **exposure to transition risk** associated with firm credit risk estimates?
  - There is a positive relationship between GHG emissions and credit risk estimates, and government policy plays a role.
2. Does **climate disclosure** moderate how firm **exposure to transition risk** is associated with credit risk?
  - Yes, climate disclosure mitigates the relation between transition risk and credit risk.
3. How is firm's **management of transition risk** associated with its credit risk?
  - Disclosing commitment to reduce emissions is associated with low credit risk.

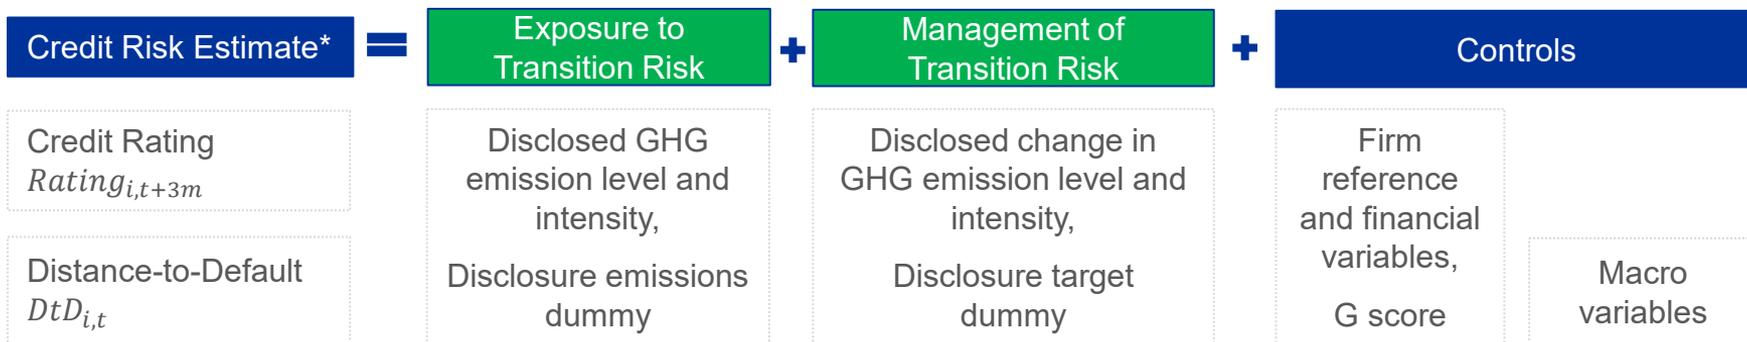

Novel dataset incl. forward-looking targets

Common framework for Rating and DtD

European vs US Transition

# A novel dataset

- Firms: non-financial firms of S&P 500 and of STOXX Europe 600
- Period: 2010 - 2019
- Geography: US and Europe
- Sources: Refinitiv, Urgentem, Bloomberg, SBTi, ECB Ratings Database, ICE, Eurostat

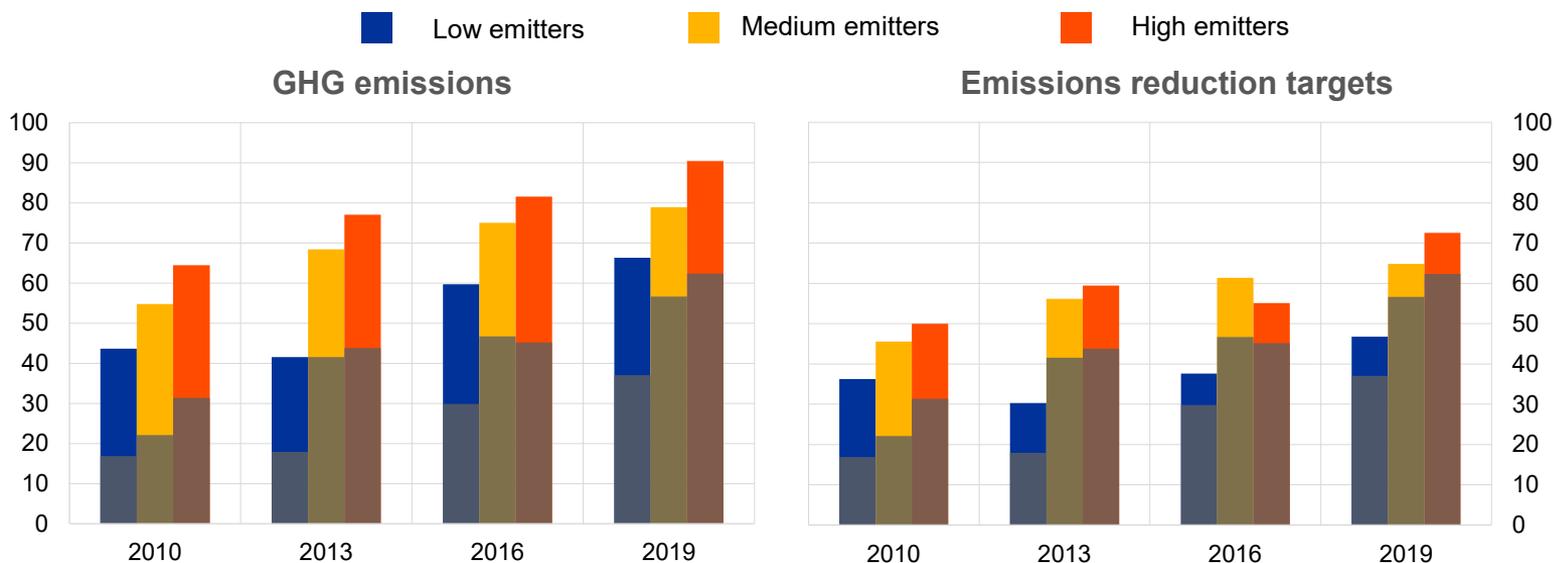

\*The higher the *Rating* or *Distance-to-Default*, the lower the Credit Risk associated with the firm

# Stylised facts

## Firms disclosing GHG emissions and emissions reduction targets

Percentage of firms in the respective emitters tercile out of 859 listed NFCs; shaded areas indicate audited disclosure

Sources: Urgentem, Refinitiv, and ECB calculations

# Credit Rating and Emissions

$$Rating_{i,t+3m} = \alpha + \beta_1 Scope\ 1_{i,t} + \beta_2 Scope\ 2_{i,t} + \beta_3 Scope\ 3_{i,t} + \sum_{j=1}^6 \gamma_j Financial\ Controls_{j,i,t} + \rho SectorFE_i + \tau TimeFE_t + \sigma CountryFE_i + \epsilon_{i,t}$$

- Higher **Scope 1 and 3 intensities** are associated with lower ratings (i.e. higher credit risk)
- Higher **Scope 1 levels** are also significant

Variable	emission intensity	emission level
Scope 1 GHG intensity	-194** (93.0)	
Scope 2 GHG intensity	900 (918)	
Scope 3 GHG intensity	-6.26** (2.71)	
Scope 1 GHG level		-0.012*** (0.0038)
Scope 2 GHG level		0.0058 (0.0073)
Scope 3 GHG level		-0.00024 (0.00050)
Controls	Y	Y
Time fixed-effects	Y	Y
Sector fixed-effects	Y	Y
Country fixed-effects	Y	Y
Observations	4,201	4,194
R-squared	0.17	0.17

# Distance-to-Default and Emissions

$$DtD_{i,t} = \alpha + \beta_1 Scope\ 1_{i,t} + \beta_2 Scope\ 2_{i,t} + \beta_3 Scope\ 3_{i,t} + \sum_{j=1}^6 \gamma_j FinancialControls_{j,i,t} + \sum_{k=1}^7 \omega_k MacroControls_{k,i,t} + \rho SectorFE_i + \sigma CountryFE_i + \epsilon_{i,t}$$

- Higher **Scope 1 and 3 intensities** are associated with lower DtD (i.e. leading to higher credit risk)
- **GHG levels insignificant**

Variable	emission intensity	emission level
Scope 1 GHG intensity	-348*** (124)	
Scope 2 GHG intensity	26.8 (212)	
Scope 3 GHG intensity	-65.1*** (21.7)	
Scope 1 GHG level		-0.0069 (0.0065)
Scope 2 GHG level		-0.0016 (0.023)
Scope 3 GHG level		0.00086 (0.00079)
Controls	Y	Y
Sector fixed-effects	Y	Y
Country fixed-effects	Y	Y
Observations	20,829	20,829
R-squared	0.35	0.34

# Credit Rating and Climate Disclosure

$$\begin{aligned}
 Rating_{i,t+3m} = & \alpha + \\
 & \beta_1 DiscloseGHG_{d_{i,t}} + \beta_2 DiscloseGHG_{d_{i,t}} * \\
 & Scope\ 1_{i,t} + \beta_3 DiscloseGHG_{d_{i,t}} * Scope\ 2_{i,t} + \\
 & \beta_4 DiscloseGHG_{d_{i,t}} * Scope\ 3_{i,t} + \beta_5 YoY\ Scope\ 1\ and\ 2_{i,t} + \\
 & \beta_6 DiscloseCommit_{d_{i,t}} + \sum_{j=1}^6 \gamma_j Controls_{j,i,t} + \\
 & \rho SectorFE_i + \tau TimeFE_t + \sigma CountryFE_i + \epsilon_{i,t}
 \end{aligned}$$

- The **act of disclosing emissions** is associated with better ratings
- A **reduction in disclosed emission intensity** is associated with better ratings
- A similar relationship is observed between Distance-to-Default and disclosure

Variable	emission intensity	emission level
DiscloseGHG dummy	0.68*** (0.21)	0.57*** (0.17)
DiscloseGHG x Scope 1 GHG intensity	-359** (171)

R-squared	0.40	0.39

# Credit Rating and Climate Disclosure

- Firms with **higher disclosed GHG intensity** and **actual GHG increase** tend to have worse ratings.
- Firms **disclosing emissions** and a **forward-looking target** to reduce emissions tend to have better ratings.
- The **magnitude** of the effect of disclosed GHG intensity is comparable to that of traditional determinants of rating

# Conclusions and policy implications

## *How is climate-related transition risk reflected in firm credit risk?*

- ✓ High emissions are associated to some extent with higher credit risk, both ratings and DtD.
- ✓ Governments' low-carbon transition policies affect transition risk and credit ratings.
- ✓ Disclosing emissions moderates the relation between emissions, ratings and DtD.
- ✓ Disclosing emission reduction targets is associated with lower credit risk, both ratings and DtD.

Caveats: Availability, reliability, and comparability of disclosed and inferred metrics of transition risk.

## *Policy implications*

- ✓ Credit rating agencies: Transparency on incorporating climate factors into CRA methodologies
- ✓ Prudential regulation of banks and insurers – link to risk weights
- ✓ Central banks' monetary and non-monetary operations
- ✓ Corporate climate disclosure: Forward-looking emissions targets and credible transition plans with milestones
