

## About NextNav

NextNav Inc. is a leader in next generation GPS, enabling a whole new ecosystem of applications and services that rely upon vertical location and resilient geolocation technology.

### NextNav TerraPoiNT

- Resilient 3D PNT solution
- Terrestrial broadcast network
- Frequency agile\*
- Leveraging existing GPS chips
- Nano-second timing synchronism to Universal Time

\*920MHz band used for trial

## JRC Testing Summary: Timing and Z

### Timing Stability

NextNav demonstrated timing stability within 15 ns 90% of the time across the network & end receiver

Timing Stability within 15 ns (90%)

### Z Accuracy

NextNav provided vertical location accuracy within +/- 1m 90% of the time through the entire test

Z Accuracy within +/- 1m (90%)
