EEA-Eionet Strategy 2021-2030 - Strategic objectives

1. Supporting policy implementation and sustainability transitions

2. Providing timely input to solutions for sustainability challenges

3. Building stronger networks and partnerships

4. Making full use of the potential of data, technology and digitalisation

5. Resourcing our shared ambitions

EEA-Eionet strategy and communication framework

“to enable a sustainable Europe through trusted and actionable knowledge”

Corporate communication (incl. social media) to:

- “...the leading network for policy-relevant environment and climate knowledge...”
= BRAND/REPUTATION
- “...impact through science-based knowledge...”
= DAY-TO-DAY OUTREACH

EEA stakeholders and target audiences

Stakeholders

Institutions and governments,
European Commission, Parliament, Council,
EEA member countries

Policy influencers

Media

Civil society, NGOs

Business

Academia, scientists

The general public

EEA knowledge consist of

- Thousands of web pages
- Publications (PDF and HTML)
- Indicators
- Visuals, charts, interactive maps, data viewers
- Data sets
- 25+ languages
- A growing number of additional platforms

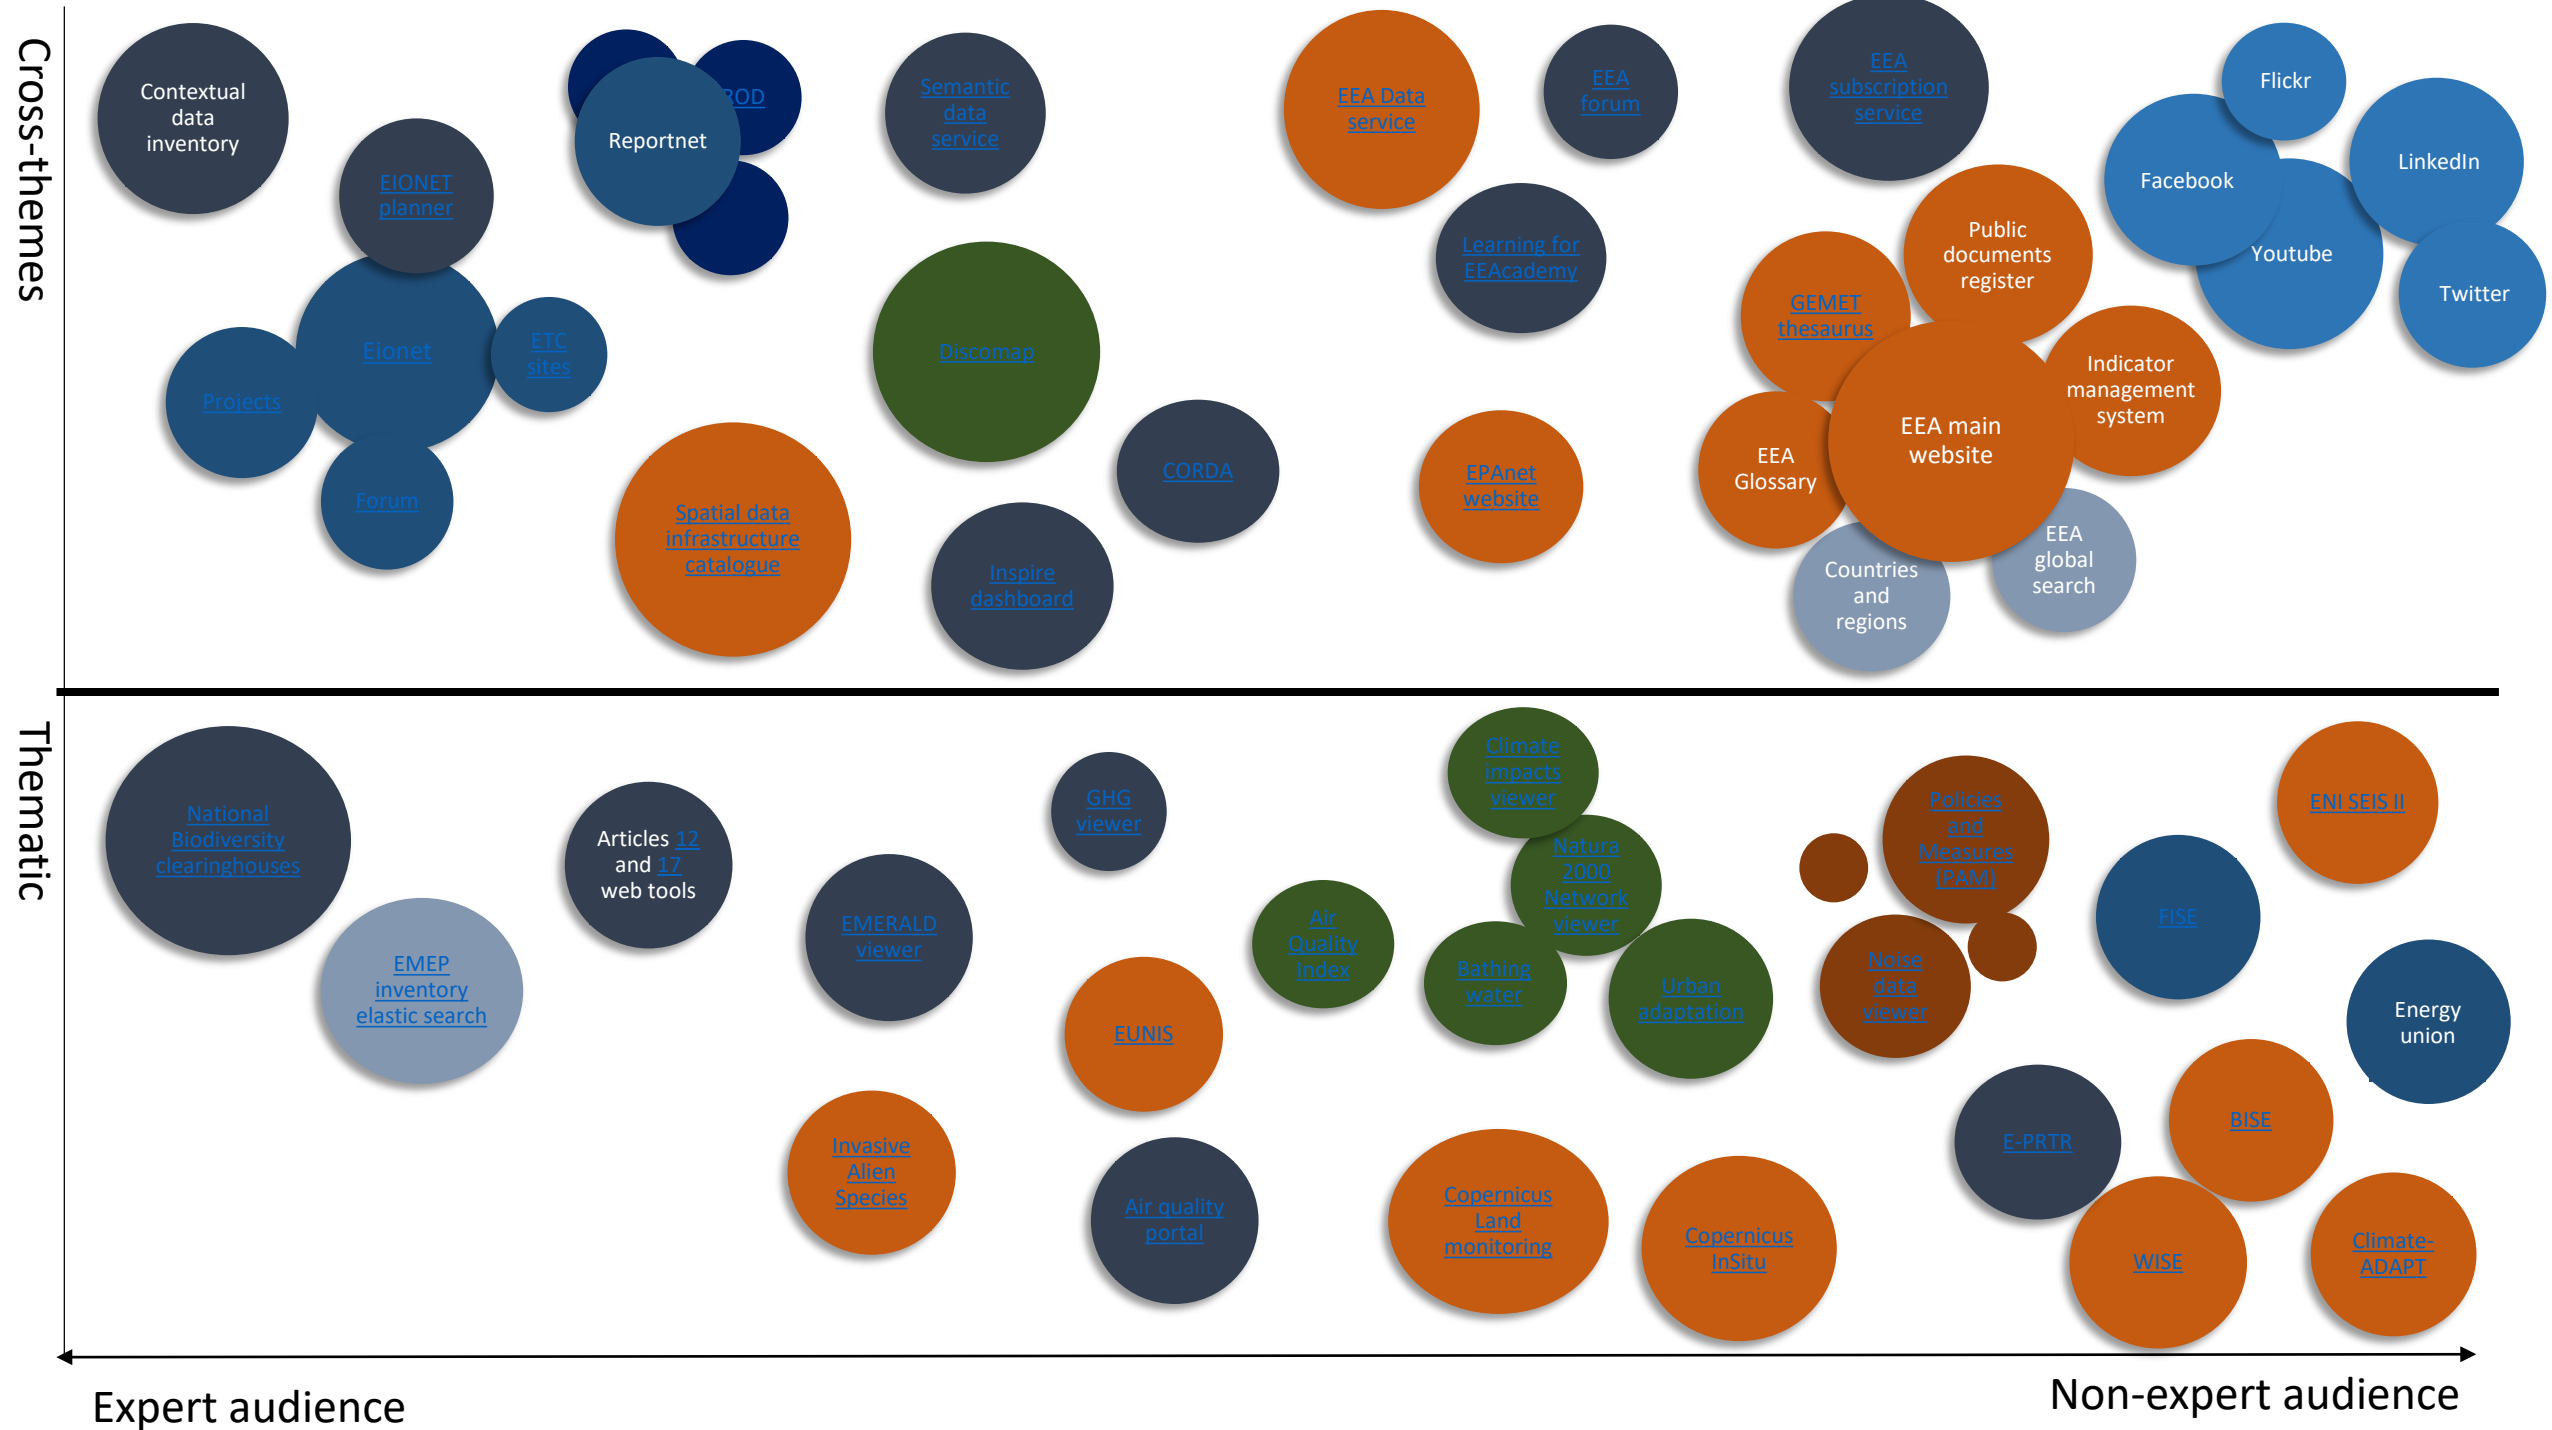

Maintaining web content and systems?

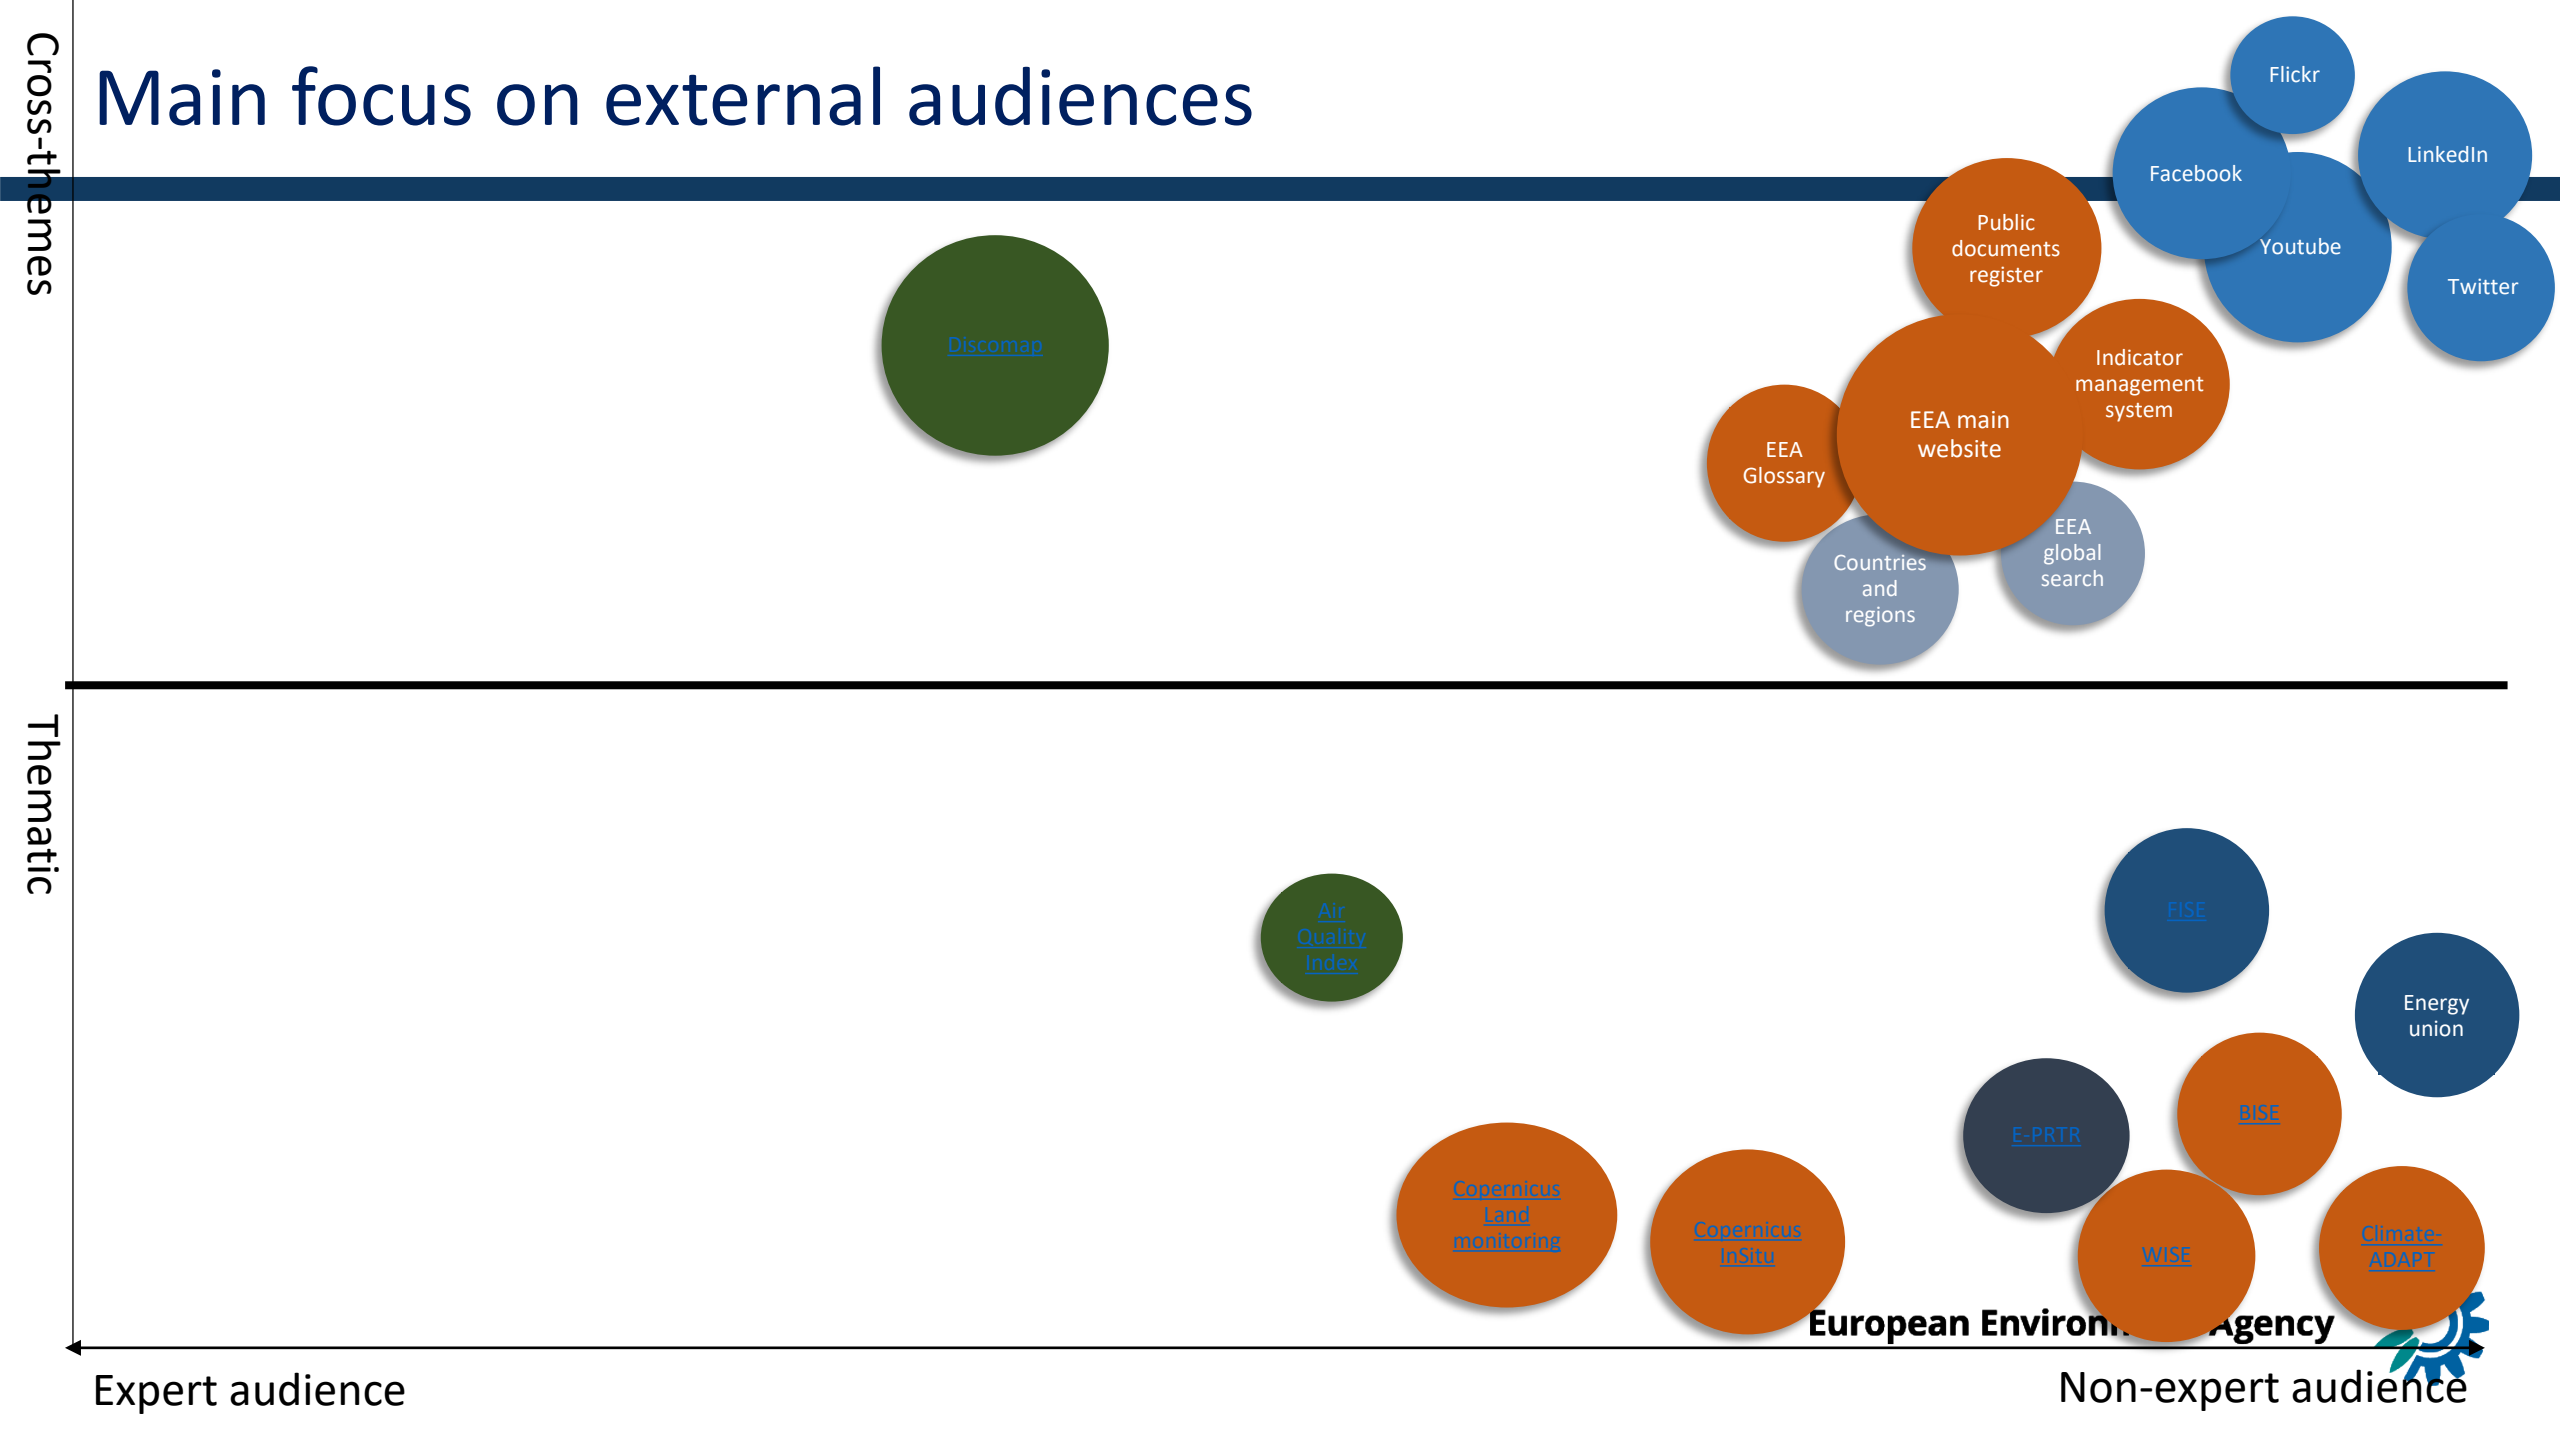

Web challenge

Main focus on external audiences

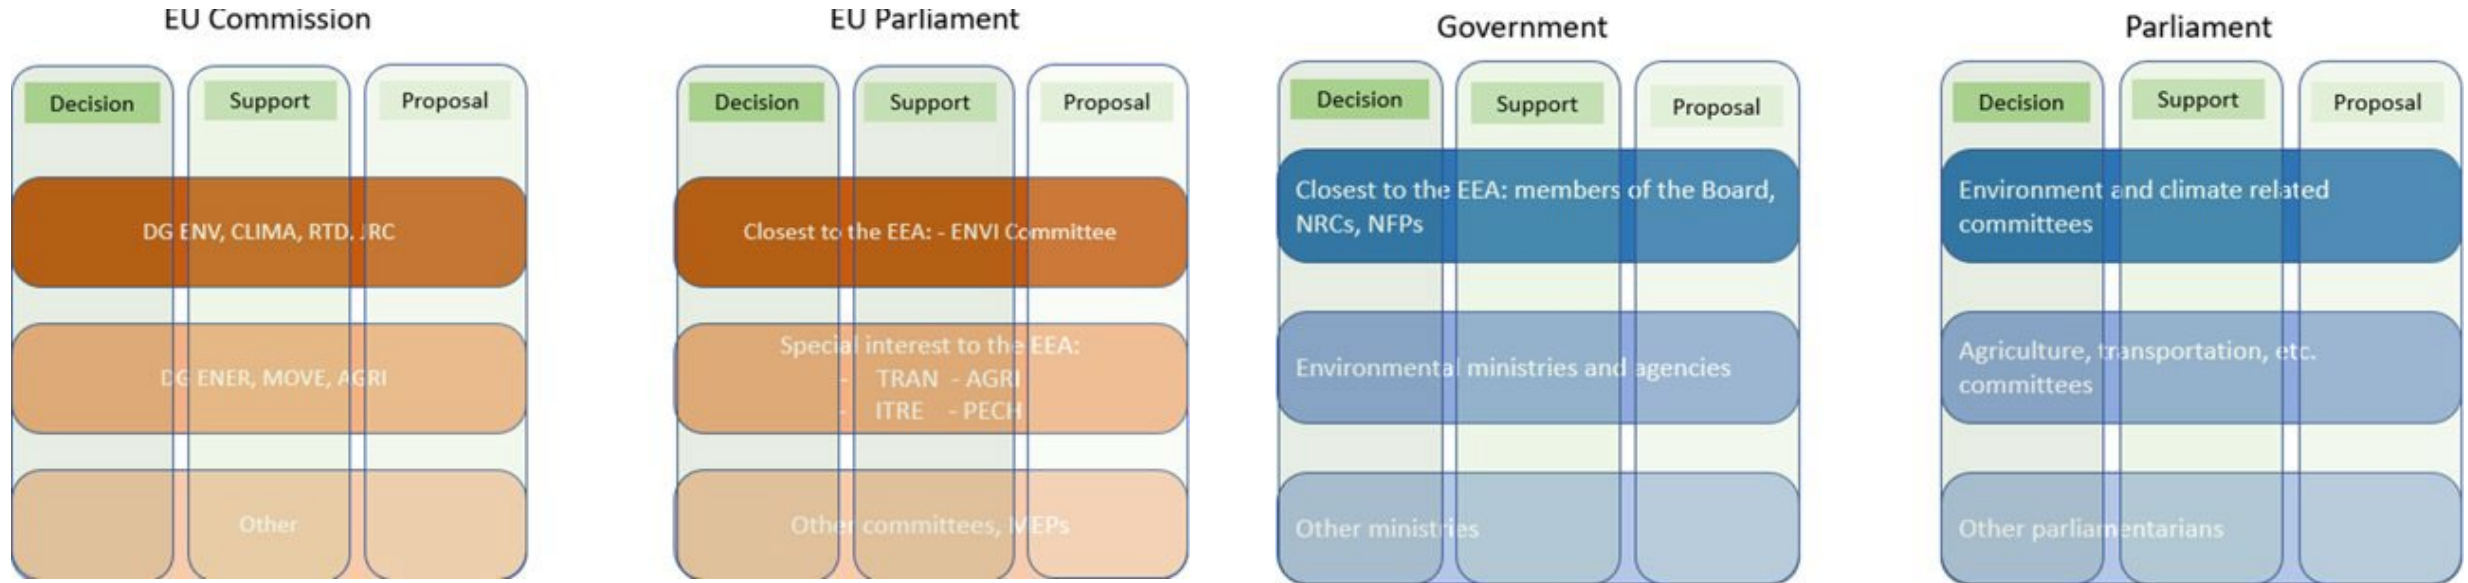

Listening to user needs

Understanding our audience

Diving deeper into policy audience

Clustering knowledge needs

Non-technical audience

A. Without time availability

- Decision makers
- General public

B. With (more) time availability

- Policymakers – advisers
- Journalists
- NGOs
- Businesses

Technical audience

C. Highly informed audience

- Technical personnel at Commission, ministries, local, regional level
- Academia

Web project

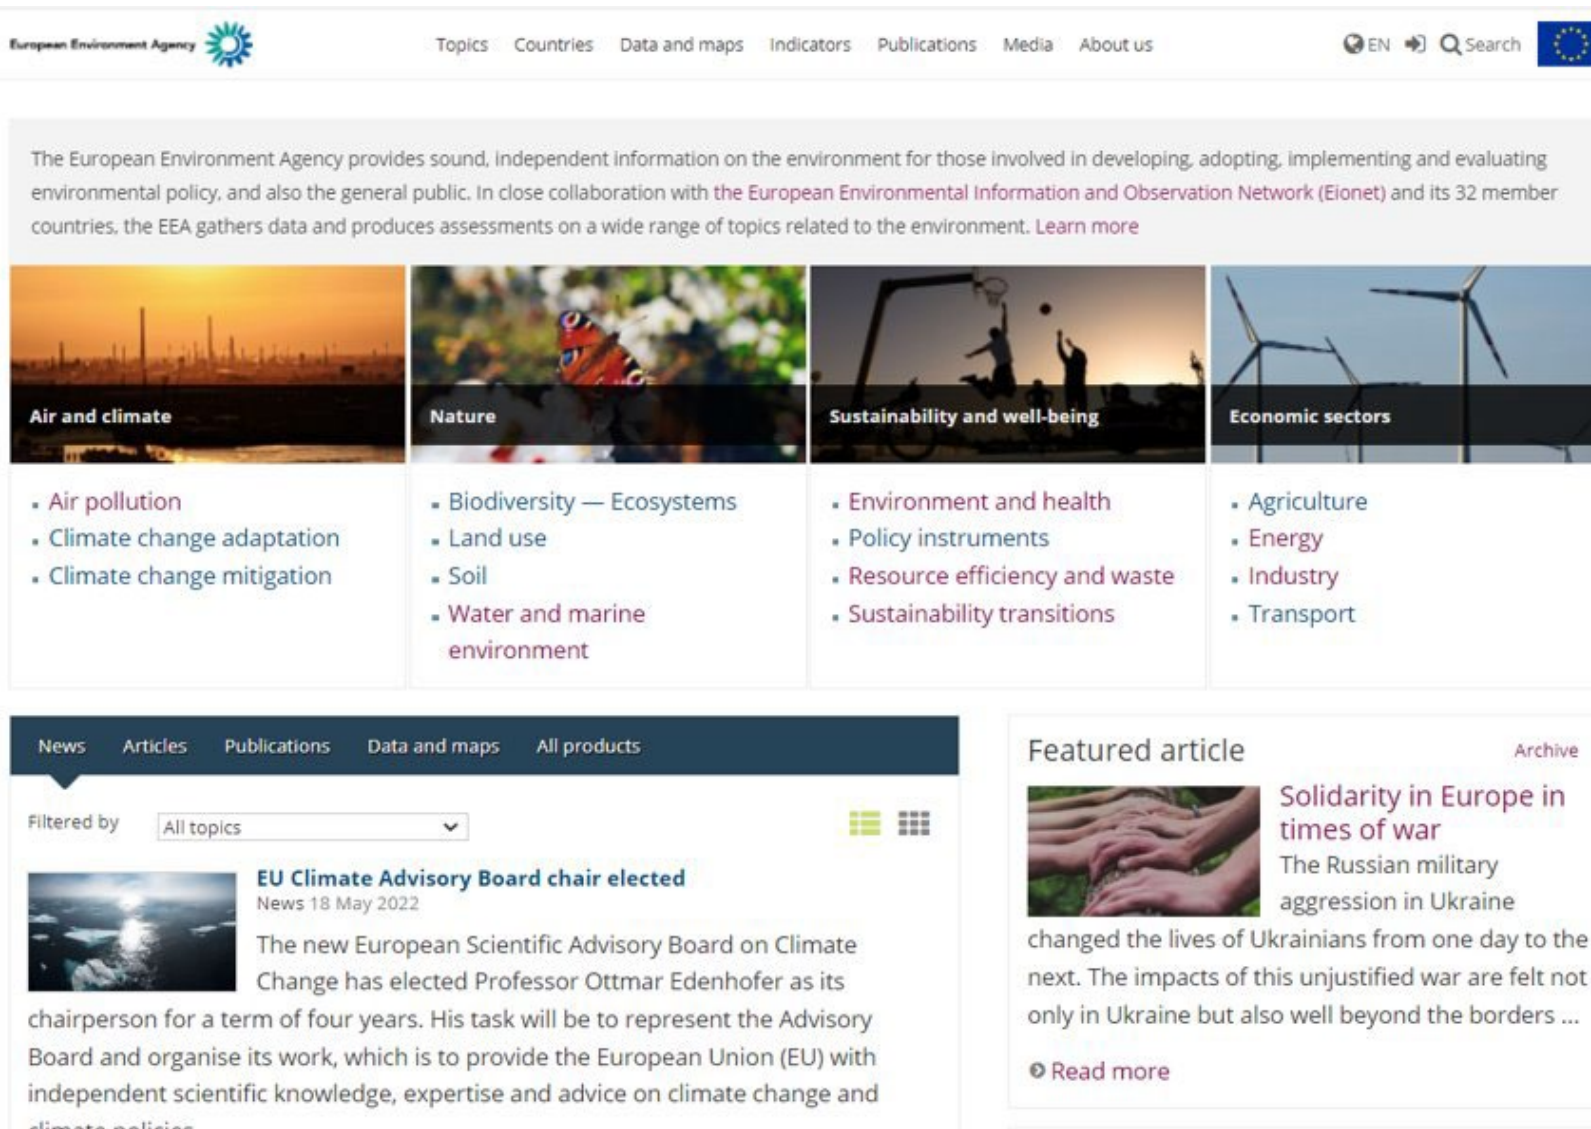

Objectives

- Brand
- Content
- Easy to access & find
- Design
- User focus
- Performance
- Maintenance and governance

Multi annual project

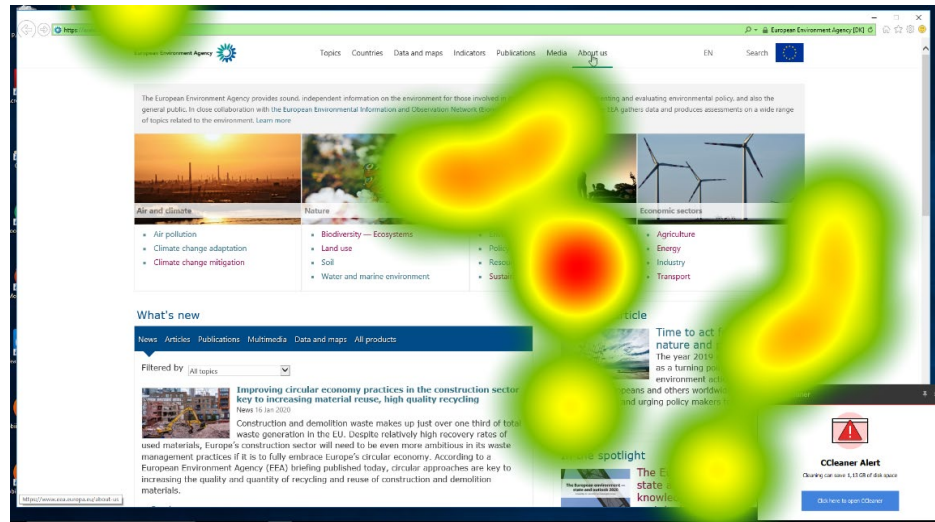

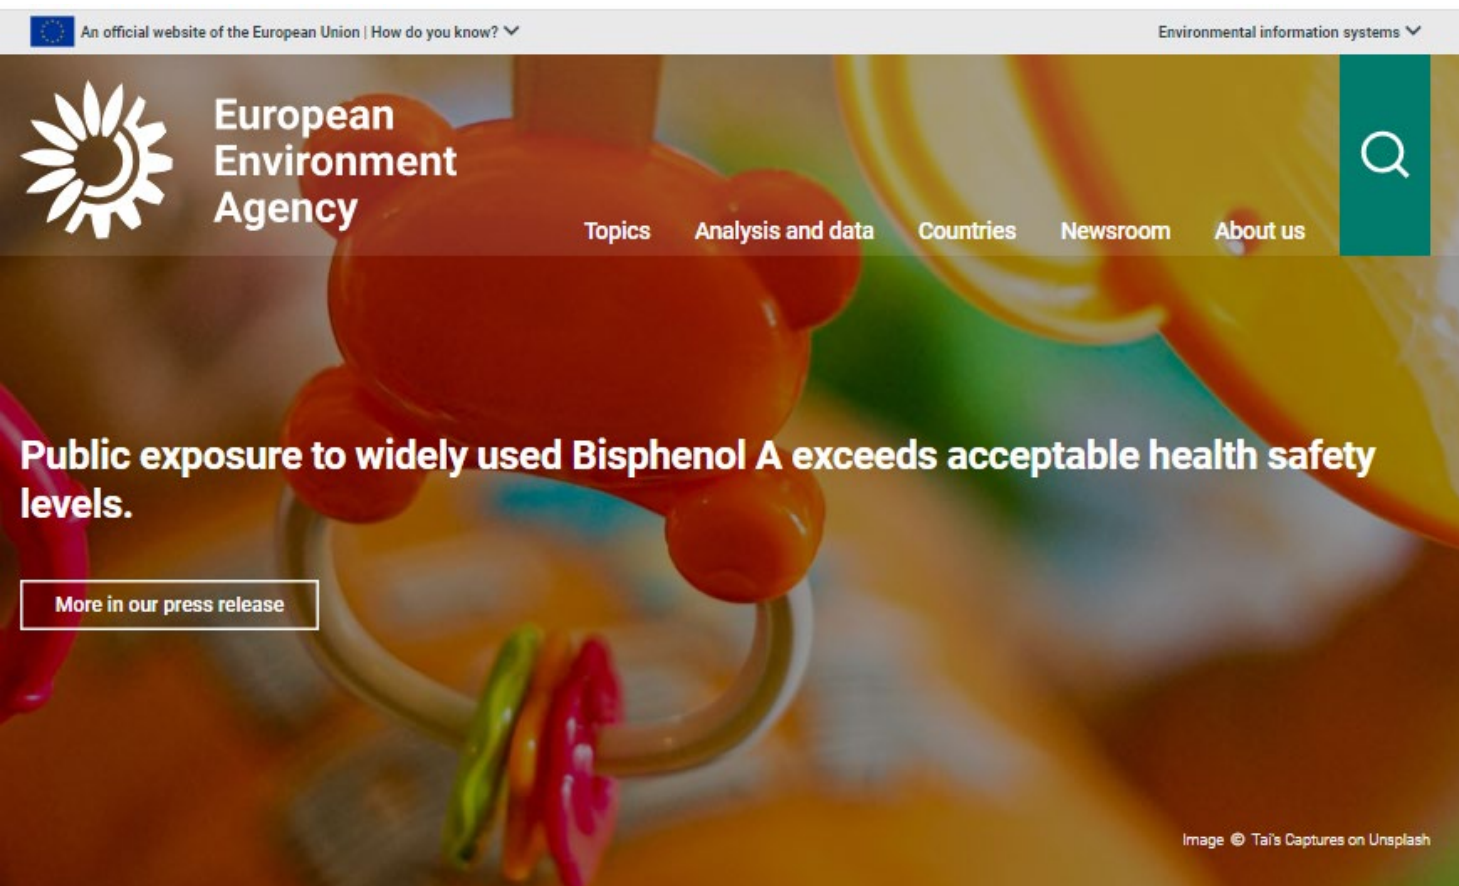

Before the project

- Low brand recognition
- Unclear what and who we were
- Dense information
- Unclear who main audience was

Where did the users look?

Current homepage

- Stronger brand
- Focus on what we do
- Simpler menu
- Thematic message
- Cleaner look

What we do

Together with our Eionet network, we provide the knowledge and the data needed to achieve sustainability in Europe.

	We support policies with evidence-based knowledge to help the European Union and our member countries achieve sustainability		We inform public and policy discussions on sustainability solutions and challenges
	We build and maintain networks and partnerships to facilitate sharing of knowledge and expertise across		We collect, quality check and disseminate data, making full use of digitalisation and latest innovative

What we do

Together with our Eionet network, we provide the knowledge and the data needed to achieve sustainability in Europe.

We support policies with evidence-based knowledge to help the European Union and our member countries achieve sustainability

We inform public and policy discussions on sustainability solutions and challenges

We build and maintain networks and partnerships to facilitate sharing of knowledge and expertise across Europe

We collect, quality check and disseminate data, making full use of digitalisation and latest innovative technologies

[More about us](#)

Preparing Europe for a changing climate

“ From wildfires to disastrous floods across southern Europe, the summer of 2023 will be remembered by extreme weather. How prepared are we for such events and their impacts? Relentless heatwaves affecting millions of Europeans across the continent, wildfires and flash floods impacting many communities call for even more ambitious action to prepare a new reality while speeding up the transition towards sustainability.

”

Leena Ylä-Mononen
EEA Executive Director

A design system

In the spotlight

- Support Europe's transition to a sustainable future with evidence-based knowledge and data.
- Build stronger networks and partnerships with state and regional governments and organisations.
- Supply input on solutions to the sustainability challenges of today - and tomorrow.
- Strengthen the EU's knowledge capacity and help secure the resources needed to create a sustainable Europe.
- Leverage the data and technology to support the EU's decision-making processes concerning the environment and climate.

Our news

Key messages

Climate change-induced sea surface temperature increases across Europe's seas have been particularly rapid since the late 1970s.

Single-use plastics represent 50% of all litter items found on Europe's beaches, fishing gear containing plastics account for another 27%.

Shipping is the main route for introduction of non-indigenous species into Europe's seas (99%), followed by marine and inland corridors (33%), such as the Great Canal.
