

Soil information needs: input for discussion

- **EU Soil Dashboard:** key indicators to monitor soil ecosystem objectives for policymakers in one page: status and foresight
- **Soil Pollution monitoring:** soil pollution dashboard for ZPAP, starting from draft watchlist of substances
- **LUCAS Soil:** develop as key data source for soil; ensure timely indicators with trends
- **Methodology for EU LDN assessment:** as ECA recommended
- **Soil indicators and information:** fill in indicators' gaps on soil degradations
- **Harmonization, complementarity, integration:** make EU and national data more complementary and interrelated; bring together also data from different sources: FISE, IACS, LPIS, WISE, BISE etc
- **Soil Biodiversity:** EU inventory of soil biota as base to answer policy questions
- **Circular economy:** develop indicators for soil as material
