

## FAS workshop 2020, 17- 18 March 2020

### Draft Agenda

The objective of the workshop is to have open and constructive exchanges about the current implementation of the Farm Advisory Systems (FAS) in the Member States. Farm advice should play an important role in the next CAP after 2020, and it is interesting to take stock of the situation after the evolution of the FAS since 2007 and before the implementation of the reform.
