

SAT4TER

Self-assessment tool for Territorial Development Strategies

Strategy CLLD Brdy-Vltava - lesson learned from the territorial peer review and using SAT4TER

Markéta Dvořáková, LAG Brdy-Vltava Czech Republic

23 April 2024

- **TERRITORIAL DELIVERY MECHANISM:** Strategy of Community-led Local Development LAG Brdy-Vltava for period 2021-2027 (CLLD) Czech Republic, Central Bohemia, 31 665 citizens
- **The strategy in a nutshell:** - supported areas: local entrepreneurs (incl. farmers), municipalities, social area, support of regional employment, schools and other forms of education, etc.
- **7 Objectives:** To improve our knowledge and skills (**education**), Good care services (**social area**), Work and do business in our region (**support of employment and local businesses**), **Community life**, Public facilities (incl. nature), **Tourisms**, **Cooperation and networking**
- **FUNDING TYPE:** Multi-funds – **ERDF, EARDF, ESF+**

How SAT4TER can support your local authority

- **SAT4TER:** Due to the tool we identified new areas we have not thought about before (and we were weak in) – **rural – urban linkages, the importance of connecting our strategy with the most important national and global territorial development agendas** (and that we need to know about them more). We ensured ourselves about the importance of **good monitoring and evaluation**.
- **SAT4TER gave us new perspective on our strategy and its broader context.**
- The way how to link the local level with the vision of the EU (**how to make regional development right and in the EU context**).

Strategy of
Community-led Local
Development LAG
Brdy-Vltava for
period 2021-2027

How SAT4TER can support your local authority

- **PEER-REVIEW:** We really enjoyed so many experts focused on our strategy and specific problems we identified. **The comparison of various regions was also very inspiring** (we have problems with overpopulation, while in Portugal they would be glad for new people comming into their region).
- **After the event we went through the main indicators of our strategy again and decide what to focus on.** We will use it for the mid-term evaluation.
- **Simple and useful process to get the outside perspective on your strategy and its objectives.**

■ SUGGESTIONS FOR PUBLIC:

To checked if everything important is included in the strategy.

You can use it anytime of the process – during **preparation, implementation and evaluation of the strategy.**

THANK YOU!

Markéta Dvořáková
